I think my intnet and ip address should remain the same and not
change all the time and i would like to be able to call 911 on vrs
it is our right to do so and I dont think anyone shouild control
how we call 911 just as they dont control hearing peoople to make
thier own 911 calls either such as payphone cell phone blah blah we
should have the choice to make our 911 calls either on tdd or vrs
or interent relay what ever we method we chose should be able to do
so without restrictions
